Summary

Software Engineer with 2 years building **Python backends**, **REST APIs**, and **AWS-deployed microservices** powering **LLM**, **RAG**, and **agentic AI** workflows. Shipped a production **RAG invoice intelligence pipeline** cutting manual review by **60%** and Dockerized **Flask/Django** services on **Kubernetes** serving **10k+ requests/day** at **99.9% uptime**. **AWS Certified Solutions Architect – Associate**.

Experience

AI Software Engineer July 2025 - Present
Omatochi Dublin, CA

- Designed and shipped a **RAG-based invoice intelligence pipeline** using **Python**, **LLMs**, and **AWS**, automating document extraction and reducing manual review time by **60%**.
- Built and deployed backend **microservices** with **Flask** and **Django**, containerized via **Docker** and orchestrated on **Kubernetes**, serving **10k+ requests/day** with **99.9% uptime**.
- Developed an **agentic AI workflow** for multi-step document and data tasks, cutting average end-to-end processing time from minutes to **seconds**.
- Integrated **multimodal LLMs** (text + image) into extraction services, improving structured-field accuracy on noisy invoices by **25%**.
- Owned **CI/CD**, **monitoring**, and **application security** for core services, increasing deploy frequency and reducing production incidents.

Software Development Intern June 2024 - May 2025
Omatochi Dublin, CA

- Built core features for a **sales forecasting tool** and an internal **chatbot** using **Python**, **REST APIs**, and **SQL**.
- Shipped full-stack functionality across a **React Native** front end and a **Flask/Django** backend, deployed via **serverless** components on **AWS**.
- Cut API response times by **35%** by optimizing **SQL queries** and caching hot paths with **Redis**.

Software Engineer June 2022 - May 2023
Deven Infotech Pvt Ltd Pune, India

- Developed **Python** and **REST API** services backing internal web applications, deployed to **Linux** servers.
- Implemented **SQL** schema changes and query optimizations that reduced report generation latency by **40%**.
- Containerized legacy services with **Docker** and wired up **CI/CD pipelines**, shortening release cycles from weekly to daily.
- Added structured **logging** and **monitoring** hooks across services, accelerating production debugging and root-cause analysis.

Projects

Agentic Document Intelligence Platform - *Python, LangChain, AWS Bedrock, FAISS, FastAPI*

- Built a **RAG pipeline** with **vector embeddings** and **FAISS** retrieval over invoices and contracts, exposed via a **FastAPI** service on AWS.
- Designed an **agentic workflow** that plans, calls tools, and validates outputs end-to-end, reducing human review touch-points by **60%**.

Serverless Sales Forecasting API - *Python, AWS Lambda, API Gateway, DynamoDB*

- Shipped a **serverless** forecasting service on **AWS Lambda** and **API Gateway** with **DynamoDB**-backed state, scaling to bursty traffic at low cost.
- Automated infrastructure and deploys via **CloudFormation** and **GitHub Actions** CI/CD, enabling safe daily releases.

Technical Skills

Languages & Frameworks: Python, Flask, Django, FastAPI, REST APIs, SQL, JavaScript, React Native

AI / ML: LLMs, RAG pipelines, agentic AI, multimodal models, LangChain, vector databases (FAISS, Pinecone), prompt engineering

Cloud & Infra: AWS (EC2, Lambda, S3, API Gateway, DynamoDB, Bedrock, EKS), Docker, Kubernetes, serverless, Terraform, Linux, Bash

Backend & DevOps: Microservices, REST/gRPC, CI/CD (GitHub Actions, Jenkins), monitoring (CloudWatch, Prometheus, Grafana), application security

Education

California State University, East Bay August 2023 - May 2025
Master of Science in Computer Science, GPA 3.5/4.0 Hayward, CA

Savitribai Phule Pune University June 2019 - June 2023
Bachelor of Engineering in Information Technology, GPA 9.3/10 Pune, India

Certifications

AWS Certified Solutions Architect – Associate
